SUMMARY

As a highly proactive and eager-to-learn individual, I always seek to deeply understand business problems - from analyzing requirements to building specification documents that support the development of user-centric systems. I am flexible in working both independently and collaboratively, always maintaining an open mind and mutual respect to achieve the best possible results.

In the next 1–2 years, I aim to achieve a Middle BA position, becoming more deeply involved in the product discovery process and contributing to the development of sustainable digital products.

EDUCATION

UNIVERSITY OF ECONOMICS - THE UNIVERSITY OF DA NANG

Da Nang

Major: E-commerce

9/2022 - 7/2026
